

XPSAC●●●●P

Operating Principle

Preventa XPSAC safety relays conform to Category 3 per EN 60954-1. They are used for monitoring:

- Emergency stop circuits (Emergency stop push buttons or cable pull switches) that conform to standards EN 60418 and EN 60204-1
- Limit switches or safety interlocks mounted on guards or doors, that conform to standard EN 61088.

These modules have a compact enclosure (0.89"/22.5mm wide).

Three N.O. safety outputs and 1 solid state output for signaling to the PLC.

Two versions are available: one has non-removable terminal block mounting, which is an integral part of the module, the other has removable terminal blocks to reduce maintenance time and replacement.

Two LEDs on the cover to provide status information for easier troubleshooting

Ordering Information

Type of connection terminal block	Number of instantaneous opening safety circuits	Additional outputs	Power supply	Catalog number	Weight oz (kg)

XPSAV11113

Operating Principle

Preventa XPSAV safety relays conform to Category 4 of standard EN 60954-1.

Preventa XPSAT safety relays conform to Category 4 of standard EN 60954-1 when instantaneous break contacts are used and Category 3 of standard EN 60954-1 when time delay break contacts are used.

They are used for monitoring:

- Emergency stop circuits (Emergency stop push buttons or cable pull switches) that conform to standards EN 60418 and EN 60204-1
- Limit switches or safety interlocks mounted on guards or doors that conform to standard EN 61088.

XPSAV1113P

Instantaneous vs. Time Delay Contacts

Instantaneous contacts (stop category 0) are used for applications where immediate removal of power is desired. These instantaneous contacts are used for most safety applications.

Time delay contacts (stop category 1) allow for controlled deceleration of motor driven components until a complete stop is achieved (i.e.: motor braking with a variable speed drive or mechanical brake). At the end of the time delay, these outputs open, removing power and drop out the motor.

The XPSAV modules have:

- A 1.77"/45mm wide enclosure.
- 3 N.O. safety outputs, 3 N.O. timed outputs, and 3 solid state outputs for signaling to the PLC.
- Two versions are available: one has non-removable terminal block mounting, which is an integral part of the module, the other has removable terminal blocks to reduce maintenance time and replacement.
- Eleven LEDs on the cover to provide status information for easier troubleshooting

XPSAT

The XPSAT modules have:

- A 3.54"/90mm wide enclosure.
- 3 N.O. safety outputs, 2 N.O. timed outputs, and 1 N.C. output.
- All the terminals are an integral part of the module (non-removable).
- Four LEDs on the cover to provide status information for easier troubleshooting

Ordering Information

Type of connection terminal block	Number of safety circuits	Additional outputs	Power supply	Catalog number	Weight oz (kg)
Non-removable	6 N.O. (3 N.O. time delay)	3 solid state	24 Vdc	XPSAV11113	11.29 (0.320)
Removable	6 N.O. (3 N.O. time delay)	3 solid state	24 Vdc	XPSAV11113P	11.29 (0.320)
Non-removable	5 N.O. (2 N.O. time delay)	1 N.C.	24 Vac/dc	XPSAT5110	22.93 (0.650)
			115 Vac	XPSAT3410	29.98 (0.850)
			230 Vac	XPSAT3710	29.98 (0.850)

Preventa XPSAV safety relays are suitable for use in circuits through Category 4 per EN 60954-1.

Preventa XPSAT safety relays are suitable for use in circuits through Category 4 per EN 60954-1 when instantaneous break contacts are used.

Preventa XPSAT safety relays are suitable for use in circuits through Category 3 per EN 60954-1 when time delay break contacts are used.

Wiring Diagrams

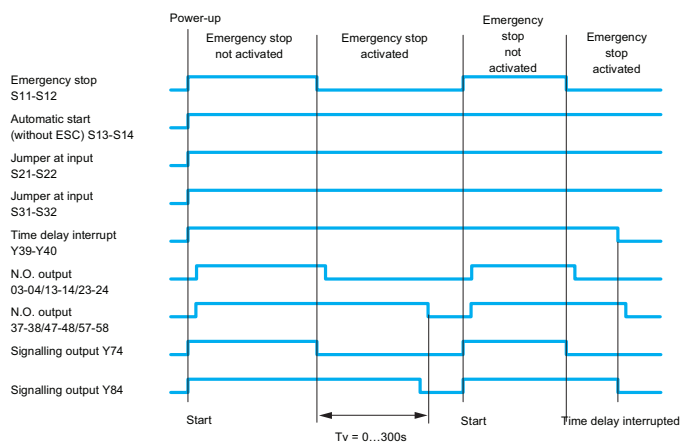

XPSAV module with an Emergency stop push button with 1 N.C. contact, automatic start or unmonitored start

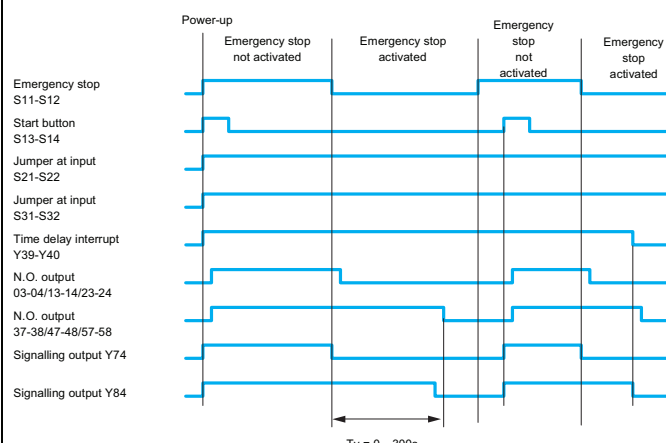

- (1) Jumper for automatic start.
 - (2) Instantaneous opening safety outputs (stop category 0).
 - (3) Time delay opening safety outputs (stop category 1).
- ESC = External start conditions.

Functional diagrams

Automatic start

Unmonitored start

Automatic start

There is no start contact or it is jumpered (wiring between terminals S13-S14).
 Note: Automatic start function is not available with 2 channel wiring on the inputs. Automatic start function is only available on single channel wiring on the inputs.

Unmonitored start

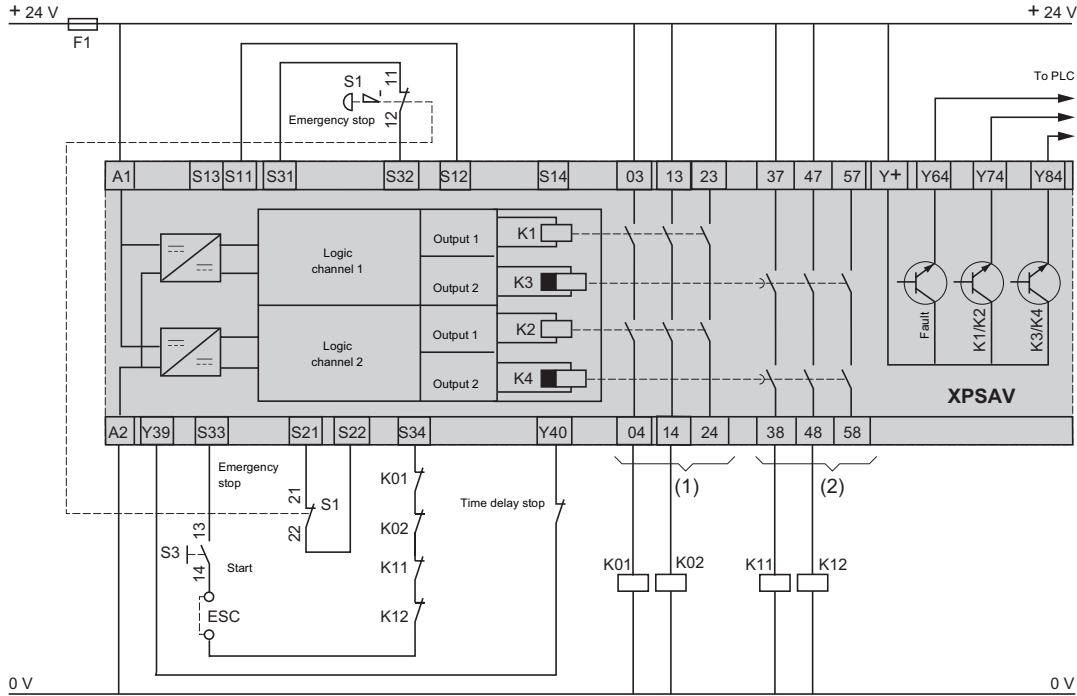

The output is activated on closing of the start contact (wiring between terminals S13 - S14).

Monitored start

The start input is monitored so that there is no start-up in the event of the start contact being jumpered or the start circuit being closed for more than 10 seconds.
 Start-up is triggered following activation of the start button (push-release function) on opening of the contact (wiring between terminals S33-S34).

Wiring Diagrams

XPSAV module with an Emergency stop button with 2 N.C. contacts, monitored start.

(1) Instantaneous opening safety outputs (stop category 0).

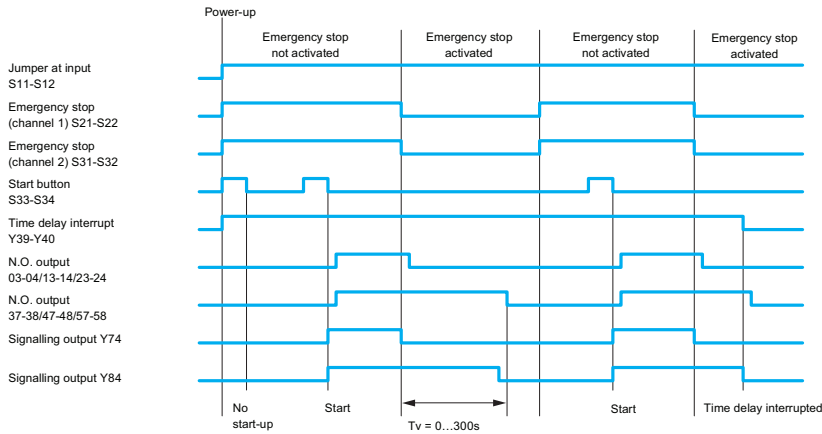

(2) Time delay opening safety outputs (stop category 1).

ESC = External start conditions.

Note: Automatic start function is not available with 2 channel wiring on the inputs.

PREVENTA™ XPS Safety Relays

Emergency stop, limit switch and light curtain monitoring

XPSAFL5130

XPSAFL5130P

Operating Principle

Preventa XPSAFL safety relays conform to Category 3 of standard EN 60954-1. They are used for monitoring:

- Emergency stop circuits (Emergency stop push buttons or cable pull switches) that conform to standards EN 60418 and EN 60204-1
- Limit switches or safety interlocks mounted on guards or doors that conform to standard EN 61088.
- Type 4 light curtains conforming to EN 61946-1 with solid state safety outputs. ▲

These modules have a compact enclosure (0.89"/22.5 mm wide)

Three N.O. safety outputs

Two versions are available: one has non-removable terminal block mounting, which is an integral part of the module, the other has removable terminal blocks to reduce maintenance time and replacement.

Three LEDs on the cover to provide status information for easier troubleshooting

Ordering Information

Type of connection terminal block	No. of safety circuits	Power supply	Catalog number	Weight oz (kg)
Non-removable	3	24 Vac/dc	XPSAFL5130	9 (0.250)
Removable	3	24 Vac/dc	XPSAFL5130P	9 (0.250)

▲ These XPS safety relays have been tested and approved for use with Telemecanique XUSLT, XUSLM, and XUSLMS light curtains with solid state outputs. They may not work with other light curtains. For further information on compatibility, contact our Customer Information Center (CIC) at 1-888-778-2733.

Suitable for use in circuits through Category 3 per EN 60954-1.

Functional diagrams

Emergency stop function

(1) With monitoring of start button
(2) Without monitoring of start button

Guard function with automatic starting

Configuration for Emergency Stop Monitoring Function

1-Channel Wiring

Emergency stop button with one N.C. contact

A short-circuit on the Emergency stop button is not detected

2-Channel Wiring

Emergency stop button with 2 N.C. contacts

A short-circuit between the 2 inputs is not detected

2-Channel Wiring

Connection of several emergency stop buttons

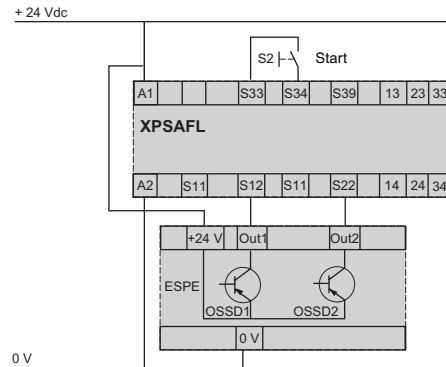

A short-circuit between the 2 inputs is not detected

Monitoring of a moving guard associated with 2 switches each having one contact (switch 1 with a N.O. contact, switch 2 with a N.C. contact) Without short-circuit detection

Monitoring of electro-sensitive protection equipment (ESPE) light curtains with solid state outputs. ▲

Key to LEDs

▲ These XPS safety relays have been tested and approved for use with Telemecanique XUSLT, XUSLM, and XUSLMS light curtains with solid state outputs. They may not work with other light curtains. For further information on compatibility, contact our Customer Information Center (CIC) at 1-888-778-2733.

Technical Data

Module type		XPSAR3●1144	XPSAR3●1144P
Products designed for max. use in safety related parts of control systems Conforming to EN 60954-1		Category 4 max.	
Power supply			
Voltage		V	24 Vac/dc, 115 Vac, 230 Vac
Voltage limits	24 Vdc	%	- 15 to + 10
	24 Vac	%	- 15 to + 10
	115 Vac	%	- 15 to + 15
	230 Vac	%	- 15 to + 10
Frequency		Hz	50/60
Power consumption		Version 24 Vdc: < 3 W, version 24 Vac: < 5 VA, 115/230 Vac version: < 7 VA	
Module fuse protection		Electronic internal	
Start button monitoring		Yes/no (configurable terminal connection)	
Control unit voltage and current (across terminals S11-S52 and S21-S22) 24 V, 48 V, 115 V, and 230 V version		V	24 Vdc (about 20 mA) (at nominal supply voltage)
Maximum wiring resistance RL (across terminals S11-S52 and S21-S22)		Ω	50
Synchronization time between inputs A and B Automatic starting, terminals S33, S34 shunted		ms	100
Outputs			
voltage reference		Relay hard contacts	
number and type of safety circuits		7 N.O. (13-14/23-24/33-34/43-44/53-54/63-64/73-74)	
number and type of additional outputs		4 solid-state outputs (Y31-Y32, Y31-Y64, Y31-Y74, Y31-Y35)	
number and type of auxiliary contacts		2 N.C. (81-82/91-92)	
breaking capacity in AC-15		VA	B300 (inrush: 3600, maintained: 360)
breaking capacity in DC-13		24 V/2 A, L/R = 50 ms	
solid-state output breaking capacity		24 V/20mA	
maximum thermal current (Ithe)		A	10
sum of maximum thermal current		A	40
output fuse protection		A	6 A or 10 A fast-acting, conforming to IEC 60947-5-1, DIN VDE 0660 part 200
minimum current		mA	170
minimum voltage		V	17
Electrical life		See page 11	
Response time on input opening		ms	< 20
Rated insulation voltage (Ui)		V	300 (degree of pollution 2 conforming to IEC 60947-5-1, DIN VDE 0110 parts 1 and 2)
Rated impulse withstand voltage (Uimp)		kV	4 (over voltage category III, conforming to IEC 60947-5-1, DIN VDE 0110 parts 1 and 2)
LED display		4	
Operating temperature		+ 14 °F to + 130 °F (- 10 °C to + 55 °C)	
Storage temperature		- 13 °F to + 185 °F (- 25 °C to + 85 °C)	
Degree of protection conforming to IEC 60529		Terminals: IP 20, enclosure: IP 40	
Connection		Type	Captive screw clamp terminals
1-wire connection	Without cable ends	Solid or stranded wire: 26-14 AWG (0.14 - 2.5 mm ²)	Captive screw clamp terminals, separate removable block
	With cable ends	Without bezel, stranded wire: 24-14 AWG (0.25 - 2.5 mm ²)	Solid or stranded wire: 24-14 AWG (0.2 - 2.5 mm ²)
	With cable ends	With bezel, stranded wire: 24-14 AWG (0.25 - 2.5 mm ²)	Without bezel, stranded wire: 24-14 AWG (0.25 - 2.5 mm ²)
2-wire connection	Without cable ends	With bezel, stranded wire: 24-16 AWG (0.25 - 1.5 mm ²)	With bezel, stranded wire: 24-14 AWG (0.25 - 2.5 mm ²)
	Without cable ends	Solid or stranded wire: 26-20 AWG (0.14 - 0.75 mm ²)	Solid wire: 24-18 AWG (0.2 - 1.0 mm ²) Stranded wire: 24-16 AWG (0.2 - 1.5 mm ²)
	With cable ends	Without bezel, stranded wire: 24-18 AWG (0.25 - 1.0 mm ²)	Without bezel, stranded wire: 24-18 AWG (0.25 - 1.0 mm ²)
With cable ends	Double, with bezel, stranded wire: 22-16 AWG (0.5 - 1.5 mm ²)	Double, with bezel, stranded wire: 22-16 AWG (0.5 - 1.5 mm ²)	

XPSAR31144

Operating Principle

Preventa XPSAR safety relays conform to Category 4 of standard EN 60954-1. They are used for monitoring:

- Emergency stop circuits (Emergency stop push buttons or cable pull switches) that conform to standards EN 60418 and EN 60204-1
- Limit switches or safety interlocks mounted on guards or doors that conform to standard EN 61088.
- Type 4 light curtains conforming to EN 61946-1 with solid state safety outputs. ▲

These modules have a 3.54"/90mm wide enclosure.

7 N.O. safety outputs, 2 N.C. auxiliary outputs, and 4 solid state outputs for signaling to the PLC.

Two versions are available: one has non-removable terminal block mounting, which is an integral part of the module, the other has removable terminal blocks to reduce maintenance time and replacement.

Four LEDs on the cover to provide status information for easier troubleshooting

Ordering Information

Type of connection terminal block	Number of safety circuits	Additional outputs	Solid-state outputs to PLC	Power supply	Catalog number	Weight oz (kg)
Non-removable	7	2	4	24 Vac 24 Vdc	XPSAR311144	10.58 (0.300)
				115 Vac 24 Vdc	XPSAR351144	14.11 (0.400)
				230 Vac 24 Vdc	XPSAR371144	14.11 (0.400)
Removable	7	2	4	24 Vac 24 Vdc	XPSAR311144P	10.58 (0.300)
				115 Vac 24 Vdc	XPSAR351144P	14.11 (0.400)
				230 Vac 24 Vdc	XPSAR371144P	14.11 (0.400)

▲ These XPS safety relays have been tested and approved for use with Telemecanique XUSLT, XUSLM, and XUSLMS light curtains with solid state outputs. They may not work with other light curtains. For further information on compatibility, contact our Customer Information Center (CIC) at 1-888-778-2733.

Suitable for use in circuits through Category 4 per EN 60954-1.

See page 70 for dimensions.

Wiring Diagrams

XPSAR

Configurations for the Emergency stop monitoring function

1-channel wiring
 Emergency stop button with one N.C. contact

Not all faults are detected:
 a short-circuit on the Emergency stop button is not detected

2-channel wiring
 Emergency stop button with 2 N.C. contacts,
 without short-circuit detection

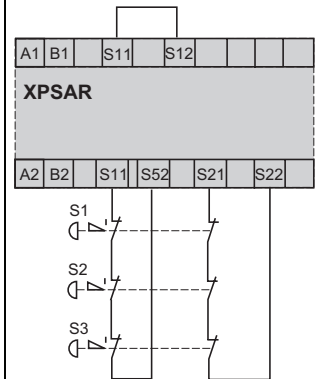

Emergency stop button with 2 N.C. contacts,
 with short-circuit detection (recommended
 application)

The two input channels are supplied with a different polarities.
 A short-circuit between the two inputs is detected

Connection of several Emergency stop buttons
 with 2 N.C. contacts (recommended application)

Starting configurations

Automatic starting

With Start button monitoring

Without Start button monitoring

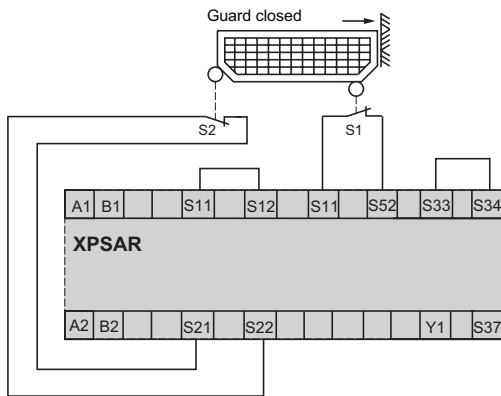

Wiring Diagrams

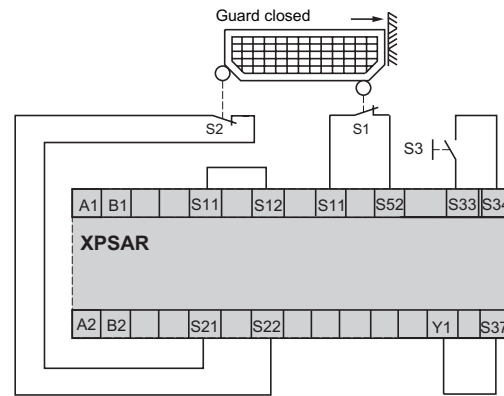

XPSAR

Monitoring of a moving guard with 2 switches each having one contact (switch 1 with a N.O. contact, switch 2 with a N.C. contact)

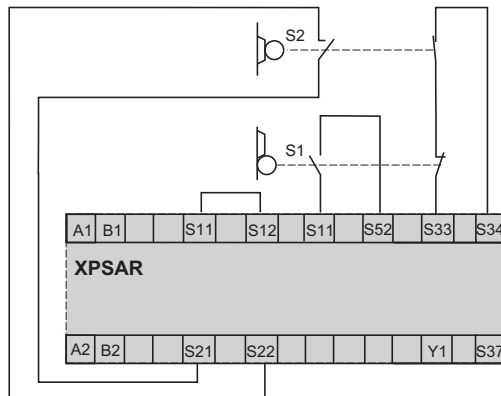

Automatic starting, without synchronization time monitoring

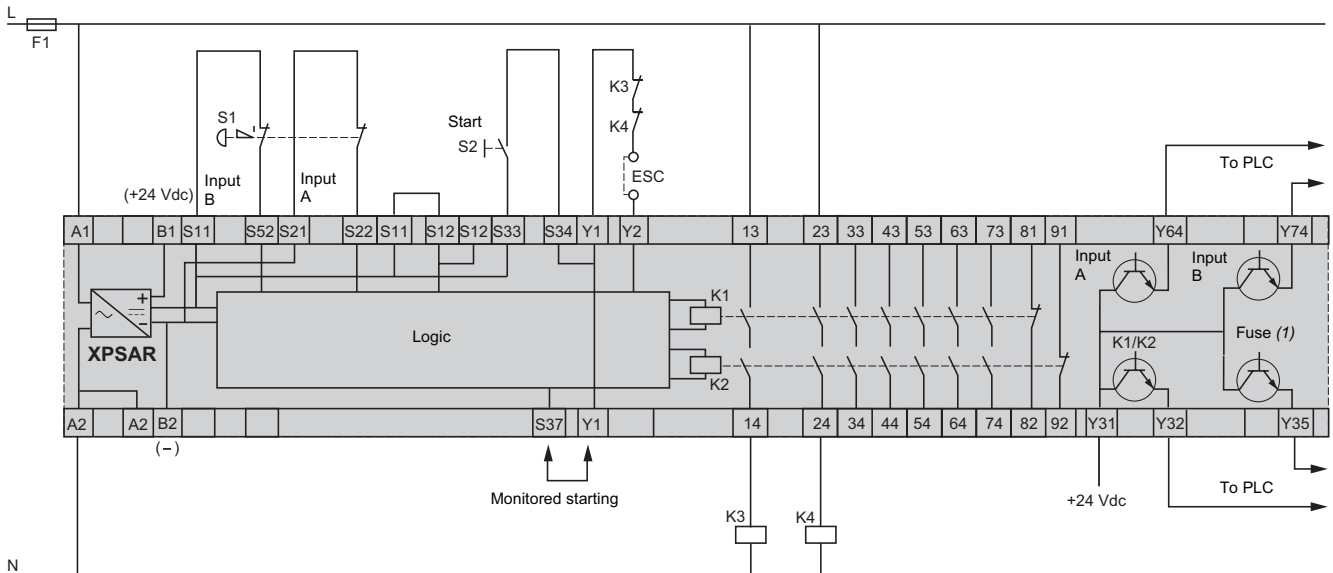

Manual starting by a start button

Monitoring of a moving guard with 2 switches and automatic starting (shown with guard open) with synchronization time monitoring

XPSAR module with an Emergency stop button with 2 N.C. contacts

Supply connection according to the voltage:
120 Vac across terminals A1/A2, or 24 Vdc across terminals B1/B2

ESC: External start conditions
(1) Operating status of internal electronic fuse

PREVENTA™ XPS Safety Relays

Emergency stop, limit switch and light curtain monitoring

Wiring Diagrams

XPSAR

XPSAR module for monitoring of electro-sensitive protection equipment (ESPE) light curtain with solid state outputs ▲

ESC: External start conditions

▲ These XPSAR safety relays have been tested and approved for use with Telemecanique XUSLT, XUSLM, and XUSLMS light curtains with solid state outputs. They may not work with other light curtains. For further information on compatibility, contact our Customer Information Center (CIC) at 1-888-778-2733.

(1) Operating status of internal electronic fuse

(2) ESPE indicator light de-activated

Example of a safety circuit with the XPSAR module in switch and PLC monitoring mode

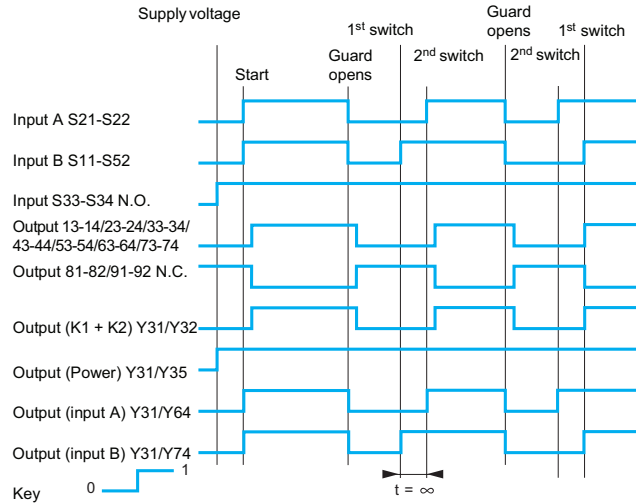

ESC: External start conditions

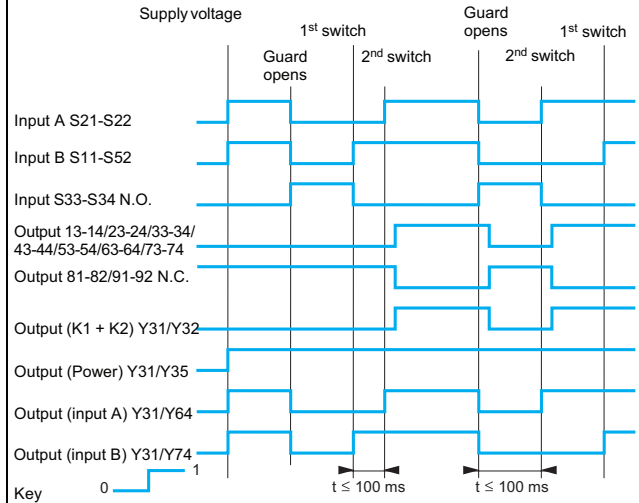

(1) Operating status of internal electronic fuse

Functional Diagrams of the XPSAR module

Monitoring of limit switches with automatic starting

Monitoring of limit switches with automatic starting and synchronization time monitoring

Emergency stop monitoring or monitoring of limit switches with monitored starting

Monitoring of light curtains (ESPE) with solid-state outputs▲ and monitored starting

▲ These XPS safety relays have been tested and approved for use with Telemecanique XUSLT, XUSLM, and XUSLMS light curtains with solid state outputs. They may not work with other light curtains. For further information on compatibility, contact our Customer Information Center (CIC) at 1-888-778-2733.

Key to LEDs

- 1) A1-A2 supply voltage, electronic internal fuse status
- 2) Input S22 (A)
- 3) Input S52 (B)
- 4) State of K1-K2 (N.O. safety outputs closed)

Technical Data

Type		XPSBA	XPSBC
Product designed for max. use in safety related parts of control systems (conforming to EN 60954-1)		Category 1	Category 4
Power supply			
voltage	V	24 Vac/dc, 115 Vac, 230 Vac	24 Vdc, 24 Vac, 115 Vac, 230 Vac
voltage limits		- 20 to + 20 % (24 Vdc), - 20 to + 10 % (24 Vac), - 15 to + 15 % (115 Vac), - 15 to + 10 % (230 Vac)	- 20 to + 10 % (24 Vdc), - 15 to + 10 % (24 Vac), - 15 to + 15 % (115 Vac), - 15 to + 10 % (230 Vac)
frequency	Hz	50/60	
Power consumption	VA	< 20 (apparent power)	< 6
Module fuse protection		Internal, electronic	
Inputs		S1: 1 N.C. + N.O., S2: 1 N.C. + N.O.
